

# Pro-Vas<sup>®</sup>

## The Minimally Invasive Alternative to Vasectomy<sup>™</sup>

Pro-Vas is a device designed to provide contraception for men by attaching a unique titanium implantable spring clip that effectively occludes each vas deferens, with no vas being cut away. Pro-Vas is the male vas-occlusive choice.

Pro-Vas—the specifically developed implantable clip that occludes the vas deferens—and its disposable applicator provide many benefits.

- **Each Pro-Vas clip is pre-loaded into the applicator**
- **Two applicators in a package**
- **Controllable jaw provides accurate and repeatable in vitro clip application**

Research indicates that many men are looking to take more responsibility for family planning activities, and they are strong advocates for new choices in male contraception. The Pro-Vas vas-occlusive procedure provides:

**PRO-VAS<sup>®</sup>**

*The Minimally Invasive Alternative to Traditional Vasectomy*
